

## How To Use Captain Richard's BEST!

### THESE PRODUCTS WILL CLEAN ABOUT ANYTHING YOU OWN!

CAPTAIN RICHARDS BEST aka, THE BOM comes with two cloths: 1) an orange, yellow, teal, pink or lavender smooth applicator cloth and a micro fiber polishing cloth.

To apply CAPTAIN RICHARDS BEST, simply dampen the applicator cloth, with water, add 2 or 3 sprays of CAPTAIN RICHARDS BEST to the applicator cloth, and move across the area to be cleaned and polished, doing a small area at a time, removing any dirt on the surface. Before it dries immediately buff with the polishing cloth to a brilliant shine.

Do a small area at a time and immediately wipe over once with the polishing cloth. Flip the cloth and give a good buff and you will see the shine emerge. For best results, keep the polishing cloth dry.

BOMBS AWAY is used like any other metal polish. First, shake well and apply a small amount to a soft cloth. Then, rub over surface to remove oxidation and simply buff to a great shine. When taking anything off from pipes, or other pieces of chrome, you must be careful, though the product is non-abrasive. The cloths and even the material you are taking off can cause scratches, so be careful.

NOTE: Bluing will normally come off pipes, just take your time, and try to use little pressure and let the product do the work.

The MICRO FIBER cloth can be used as a polishing cloth or chamois. When dampened, you can wipe down your bike, even if you have light road dust on it, without scratching or streaking. When washing your bike the MICRO FIBER cloth should be used, instead of sponges or regular cloths, to prevent scratching. It also makes the best polishing cloth you can buy. You can wash these cloths many, many times. Wash like anything else, but no fabric softener, and hang to dry.
